About Me

I enjoy working across a range of fields, but my core strengths lie in full-stack development, machine learning and computer vision. I've put them to work at large companies and on my own projects, building and shipping real solutions.

Experience

Student Assistant , Novo Nordisk Engineering	Feb 2025 – Present
• Tasks include computer vision, robotics, PLCs, 3D modeling and printing.	
Data Engineer , Embla Medical	May 2024 – Aug 2024
• Migrated on-premise databases to the cloud through data pipelines and process automation.	
Teaching Assistant , Reykjavík University	Aug 2023 – Jan 2025
• Courses included programming, mathematics, and biomedical engineering.	
Research Assistant , Reykjavík University	Aug 2023 – Jan 2024
• Research and testing of machine learning methods for optimizing antenna design.	
Contractor , Reykjavík University	May 2023 – Sep 2023
• Developed an ECG amplifier board meeting medical standards with a 91 dB CMRR.	
Electronics Lab Cover , Reykjavík University	Jun 2023 – Jul 2023
• Managed daily operations and provided technical support.	
IT Support , Iceland Revenue and Customs	May 2022 – Sep 2022
• Resolved technical issues and trained staff on system operations.	

Projects

SNAM / snam.is	2025 – Present
• Ongoing startup, a mastery-based math platform grounded in cognitive science and learning research, built as one low-friction, low-cognitive-load system. Funded by the Icelandic Technology Development Fund. • Generates word problems matched to each student's interests and level, personalizing the problem context itself. • Reads handwritten calculations in real time, identifying what the student was attempting using a system that unites machine learning and symbolic reasoning, developed as my MSc thesis.	
IRON HORSE / video demo	2023
• BSc team project, we built an autonomous mobile robot for fish-factory workflows. I was responsible for the navigation stack, including mapping, path finding and obstacle avoidance.	

Education

M.Sc. in Autonomous Systems , Technical University of Denmark	Sep 2024 – Aug 2026
B.Sc. in Computer Science , Reykjavík University	Aug 2021 – Jun 2024
Dean's List in 2023	
B.Sc. in Mechatronics Engineering , Reykjavík University	Aug 2020 – Jun 2023

Skills

Languages: Python, TypeScript, SQL, C++ , Rust

ML & Computer Vision: PyTorch, TensorFlow, Ultralytics, scikit-learn, OpenCV, HPC

Tools & Frameworks: Vue.js, Django, PostgreSQL, .NET, Databricks, Azure, Linux, ROS2, Docker, Git, Jira

Spoken languages: Icelandic (native), English (fluent), Danish (basic)
